

'Beyond the Pandemic, into a Next Wave' Bio-Korea 2022

'포스트 코로나와 미래 혁신기술' 바이오코리아 2022

PRESS RELEASE

May 11, 2022

BIO KOREA 2022 International Convention will take place in COEX, Seoul from May 11(Wed.) to May 13(Fri.) 2022.

Initiated in 2006, BIO KOREA is the biggest global bio-health convention in Asia that is dedicated to promoting the international standing of Korea's healthcare industry and ensuring the industry's sustainable growth.

In 2021, the international convention faced a new challenge of organizing an online-offline hybrid event amidst the pandemic, but against the odds it further galvanized its reputation as Korea's leading international bio-health convention, attracting 14,000 participants from 700 companies and organizations in 50 countries. With high hopes for the post-COVID era in 2022, this year's convention is organized under the banner of "Beyond the Pandemic, into the Next Wave." The programs are centered around various businesses in the bio-health industry, for example post-COVID, digital healthcare, and up-to-the-minute therapeutic technologies.
